

GREAT BIG WAR GAME

Product Description

Great Big War Game is a casual tap and swipe turn-based strategy game where players take turns moving their troops around the grid-based battlefield, adapting their strategies on the fly as they attack enemies with land, sea and air units. It puts an accessible new spin on the often complicated genre, mixing the best of strategic board games and classic PC strategy titles.

The campaign includes dozens of original levels and settings, as the ambitious sergeant attempts to placate the dimwitted general while keeping his own troops free of mortar shells and rifle rounds. With a hearty sense of humour, funny cartoon military units and a stunning fictional world, it puts an addictive twist on battling your buddies. Don't just talk smack with your friends... back it up with a bullet!

Great Big War Game includes platform independent multiplayer, meaning friends can seamlessly wage war between Android and iOS, as well as between the forthcoming versions for PC, Mac AppStore and Blackberry Playbook.

The battles play out asynchronously, like the popular "With Friends" series, but unlike those games you can tackle the challenging campaign while you're waiting for a buddy's counterattack. With a greatly expanded single player campaign, brand new online multiplayer and a whole raft of other cool new features, there's plenty to please that 2.5 million strong player base.

Key Features

Massive Campaign – 50 challenging single player missions start off simple and evolve into an all-out warzone

Online, Asynchronous multiplayer – Battle Android players from your iOS device, take on iPad players from your Android tablet... it all "just works"

Huge variety of units & buildings – Grenadiers, tanks, snipers, flamethrowers and bazooka infantry all mean business! Keep an eye out with scouts as your engineers capture enemy fortifications.

Tons of multiplayer maps – Wide variety of levels keep every fresh, with different strategies for hilly terrain, deep jungles, remote islands and more

Customize your armies – Manage your in-game resources to suit your style of play. Will you chip away with a dozen grunts, or bet it all on a fearsome warship?

Product Summary
